Personal Portfolio: <https://bttisrael.github.io/portfolio-data/>

SUMMARY

Decision driven professional, specialized in leveraging data science, data analysis and prescriptive analytics to solve complex challenges. With over 4 years of experience, I have used data as a path to cost reduction, automate manual processes and optimize planning. Delivering end-to-end solutions, from data extraction with **RPA, API'S, SQL, Python, Excel/Sheets** and updating in cloud with **AWS** and **GCP** to deploying with **Looker/Power BI/Git/Vercel** and **Streamlit**.

CORE EXPERTISE

- **Supply Chain Forecasting and Operational Research:** Strategic planning, ML forecasting, production mix modeling, Route optimization (**OTIMIX, Pyomo, Gurobi, Scikit-Learn**) and trade-off analysis.
- **Advanced Cloud Analytics:** Building automated pipelines using **Python** (Pandas, Selenium), **SQL, GCP, AWS** and **Git**.
- **Visualization and Deploying:** Developing dashboards (**Looker/BI/Tableau**) with proper **ETL** to build clear decision-driven dashboards and applications.

PROFESSIONAL EXPERIENCE

COMPASS UOL | Operacional Research Data Scientist | Jul 2026 – Present

- **Operations Research (Optimization):** Engineered and maintained **MILP** models with pyomo to optimize gas transportation.

GRUPO BOTICÁRIO | Senior Data Analyst (Data Science focused) | May 2025 – Jul 2026

- **Logistics Cost Optimization:** Developed a vehicle load optimization tool using SQL and Looker Studio identifying over **BRL 15M+** in cost saving opportunities for Distribution Center replenishment and enabling the creation of budget plan.
- **Data Science:** Engineered a vehicle demand forecast model by using Python (ETL, EDA) and Machine Learning (LightGBM) achieving **15%** Mape to predict weekly vehicles for DC's supply.
- **Process Automation (RPA):** Leveraged Python (Selenium, Pyautogui) and Google Apps Script Saving **1500+** manual hours per year, automating vehicle scheduling, daily reports and data collection from diverse sources.
- **Operations Research (Optimization):** Developed a optimization system in Python with Google OR Tools and Gspread that enables simulations on truck palletizations, improving truck occupancy by **20%**.

BRF | Planning & Optimization Analyst | Sep 2023 – May 2025

- **Prescriptive Analytics:** Optimized the global production mix of **22** factories using heuristics and Linear Programming (OTIMIX) to maximize profitability under capacity constraints, achieving **87%** plan adherence by improving the bussiness rules on the optimization system.
- **Trade off Analysis:** Performed feasibility studies and trade-off analysis for strategic allocation and productions decisions.

- **Process Automation:** Automated processes with VBA and SQL to optimize calculations and exclude seasonal variables.

GRUPO PLUMA | Data & Optimization Analyst | Sep 2022 – Sep 2023

- **Optimization:** Optimized the production mix of 4 factories with (**OTIMIX**), modifying the company production strategy through profitability focus and directly contributing to a **BRL 3M+** turnaround.
- **Insight Delivery:** Delivered decision-driven Power BI dashboards to monitor planning adherence, production and pricing strategies.
- **Trade-off:** Delivered a product using python and SQL that automated the trade-off analysis.

PERSONAL PROJECTS | Data Scientist | Oct 2024 – Present

- **Squad Optimizer (Project):** Engineered a data-centric product feature using **Python, Gurobi, SQL** and **BigQuery**, unifying diverse data sources into a live recommendation tool available on **Streamlit**.
- **Beverage Forecasting & Fleet Optimization (Project):** Developed a Production **MLOps** and **Operations Research** platform that forecasts beverage demand, minimizes fleet size plus route freight cost across a various vehicle types network.

EDUCATION

- Postgraduate Degree in Data Science & Artificial Intelligence | UNOPAR | Conclusion: 2025
- Bachelor's Degree in Production Engineering | UTFPR | Conclusion: 2021

TECHNICAL SKILLS

- Languages & Tools: Python, SQL, VBA, Gurobi, OTIMIX, OR Tools, Pyomo.
- Cloud & Infrastructure: Google Cloud Platform (GCP), AWS, Git, Docker.
- BI Tooling: Streamlit, Power BI, Looker Studio, Tableau, Streamlit.
- Methodologies: Linear Programming, Machine Learning, Data Quality Enhancement, RPA.

INTERNATIONAL EXPERIENCE

- **Exchange Program (UK):** Immersive English language study, cultural exchange, and community volunteer work.
